

Table 4 Common indicators of polymorphisms of natural populations of *Glyptotendipes glaucus* in reservoirs of Kaliningrad

Indicators of polymorphisms	Karesevka 13.06.12	Chisty 14.06.12	Shkol'noe 15.06.12	Pen'kovoe 18.06.12	Mel'nichnyi 21.06.12
Number of individuals studied	27	27	52	3	27
Number of individuals with standard karyotype	7	13	16	3	15
Percent of polymorphic individuals	70,4	51,9	65,4	-	40,7
Number of heterozygous inversions per individual	0,93	0,63	0,75	-	0,55
Number of inversion sequences	7	5	11	0	3
Number of genomic combinations	14	8	21	1	6
Number of inversion sequences per number of genomic combinations	0,5	0,63	0,52	0	0,5
