

## BENEFITS OF USING EDUCATIONAL APPS FOR BIOLOGY LEARNING

Ф.П. Зуфаров, Е.В. Кошарская

Самарский университет, Самара, Россия

The research opens up a new field in learning of University subjects by mobile apps. The main objective of the research was the analyzing of benefits of using educational apps for Biology learning and in the future to study many other university subjects besides biology. In the process of this study, programming methods and a survey in the control group were used. The results show that it would be convenient for students to use the app instead of manuals for the disciplines. Summing up the results, it can be concluded that the use of applications saves student's time, integrates modern technologies into the learning process and saves a large amount of resources.

**Keywords:** educational application; digital learning; Biology; university disciplines; university; programming.
